

Dump Valves DVU Series

The DVU Series features pneumatically controlled dump valves. The valves open and close automatically by pneumatic control from FW Murphy level controller and dump valve operator. Diaphragm actuated, the DVU series dump valves operate at 30–70 psi (207–483 kPa) [2.07–4.83 bar] and up to 2000 psi (13.8 MPa) [138 bar] vessel pressure (depending on the model).

A key benefit of this design is a hex union that provides the ability to replace the seat without removing the valve from piping.

The DVU Series is compatible with FW Murphy level controllers. They feature a soft seat valve and manual valve operator.

Designed for gas compressor scrubbers, the DVU Series can be used to dump any liquids compatible with its materials of construction.

Scrubber Level Systems (SLS)

The FW Murphy Gas Compressor Scrubber Level System (SLS)

The system provides for liquid control in gas scrubber applications, by dumping liquids to drain and protecting compressors with a high liquid level switch. Wetted metal parts are made to survive constant use in corrosive environments.

Pneumatic Level Control
Float actuated level snap-acting switch controls pneumatic pressure to open and close dump valve.
LS200NDVOR: Dump Valve Operator, pressure regulator and pressure indicating Gage.

SLS includes LS200, LS200NDVOR and DVU valve:

- SLS2120** - Includes DVU2120 valve
- SLS150** - Includes DVU150 valve
- LR** - Less regulator option available

MSLS includes MLS-020, LS200NDVOR and DVU valve:

- MSLS150** - Includes DVU150 valve
- LR** - Less regulator option available
- TF** - Test function option available with MSLS150
