

Freezeless Control Dump Valves CV20 Models

The CV20 control valve is a rugged, compact, freezeless dump valve. The body can be installed so that the valve cage and plug are submerged into the process media giving the valve its freezeless characteristic.

Typical installations include separators, scrubbers and other production vessels.

The hammer union makes maintenance easy by allowing the topworks to be removed without taking the valve out of line.

Using the same trim set as the CV10 valve, the CV20 offers the versatility of multiple trim sizes and material options. A NACE option is also available for sour service.

Specifications

Connections:

1" female NPT x 1" female NPT (CV20)

2" male NPT x 1" female NPT (CV20)

1" male NPT x 1" female NPT (CV20N)

Body Type: Freezeless angle body design

Trim Characteristic: Quick open, modified percent (throttling)

Trim Size: 0.25", 0.375" (3/8"), 0.50"

Pressure Rating: 3000 psi (CV20), 1480 psi (CV20N),

Temperature Range:

-20° F to 200° F (-29° C to 93° C) standard

-50° F to 200° F (-46° C to 93° C) low temp

Shutoff: ANSI Class IV

Actuator Sizes: No. 35 (35 in² area), No. 70 (70 in² area) **Input**

Signal Ranges: 3-15 psi, 6-30 psi

Materials:

Body: A105 steel, A350 LF2 (low-temp option)

Packing Plug: 304 stainless steel

Hammer Nut: A105 steel, A350 LF2 (low-temp option)

Trim: 17/4 stainless, carbide (optional)

Stem: 303 stainless, 316 (optional)

Actuator Housing: Carbon steel

Approximate Weight:

With #35 Actuator: 25 lbs. (CV20), 23.5 lbs. (CV20N)

With #70 Actuator: 35 lbs. (CV20), 33.5 lbs. (CV20N)

Cv Values

Cv Values at 100% Open		
Trim Size (in.)	Trim Type	
	Quick Open	Throttling
0.25	1.4	1.3
0.375	2.0	1.9
0.50	2.3	2.2

CV20 Reverse Acting

CV20 Non-Adjustable
