

KOCSIS®

BUILT FOR TOMORROW
SINCE 1967

KOCSIS Hydraulic Starter Systems

Kocsis hydraulic starters produce higher torque and acceleration, resulting in faster and more reliable engine starts. Kocsis hydraulic starting systems can overcome "black start" conditions using our hand pump to maintain critical operations during emergency situations.

E-SERIES (CMD-3A)

The starter of choice by engine OEMs, the E-series repeatedly produces 200 ft-lb of torque. It weighs significantly less than other gear motor-driven starters at 46 lbs and provides more power per pound.

The E-Series can be found in applications including frac pumps, emergency gen-sets, and fire pumps on offshore platforms.

The E-series can start an engine up to 100 liters (6100 cu. in.). E-Series Models: E1-11C2200-30200, E1-12C2200-3R200, E1-12C2200-3L200, E1-12C2200-30200
